

ECON[®] multi-membrane.

Air-tight flush-mounting installation.

Guaranteed air-tight – permanently!

ECON[®] multi-membrane.

- Elastic ECON[®] multi-membrane for the guaranteed permanent air-tight connection of cables and conduits.
- Easy toolless cable and conduit entry.
- Segmented membrane stabilises entry and prevents leaks.
- No tearing of the ECON[®] entry even with multiple cable population.

One-gang and one-gang junction box with ECON[®] multi-membrane.

The segmenting of the ECON[®] multi-membrane prevents gaps and leaks when more than one cable is inserted.

For inserting more than one cable or conduit M20/M25.

Hollow chamber blocks create a vertical air-flow. The flush-mounting boxes with ECON[®] technology prevent air from exiting through the wall.
