March 4th, 2025

Note: This communication is being sent to Distributor Owners and Principals and Automation Leadership. Please cascade this information as appropriate within your organization.

To: Rockwell Automation Global Distributors

Effective March 4th, 2025, the U.S. Government released new tariffs on materials and goods imported into the United States from the countries of China, Mexico, and Canada. These tariffs included an incremental 10% on China imports (in addition to tariffs imposed last month), as well as implementing tariffs on Mexico and Canada imports (both 25%) that were originally announced in February and subsequently put on hold. In all three cases, these tariffs became activated on March 4th. Similar to other multinational manufacturers, such tariffs have an immediate and highly material impact on Rockwell Automation's product portfolio at either a materials, subcomponent, finished good, and/or supply chain level.

Rockwell Automation has been working diligently to mitigate, minimize, and absorb the impact of such tariffs and the efforts will continue throughout 2025. Unfortunately, given the immediacy, scope, and magnitude of these new tariffs, combined with the uncertain duration and potential expansion, we must now take immediate action to address this instant change in the business environment.

Effective March 4th 2025, Rockwell Automation will have a List Price adjustment on a subset of the Rockwell Automation portfolio. A defined list of affected Price Group Codes (PGCs) is on the following pages. It is worthwhile to note that the number of total PGCs impacted is 228, while 617 PGCs are not impacted by these tariffs at all. The 228 affected PGCs are segmented into clear and transparent groups, specific to each tariff action. The incremental China tariff will result in a 1.5% increase on 166 of the 228 PGCs, the Mexico tariff will result in a 3.0% increase on 176 of the PGCs, and the Canada tariff will result in a 0.75% increase on 21 of the PGCs. Again, the vast majority of PGCs are not impacted by these tariff-based adjustments. If the U.S. Government eliminates, expands, or adjusts these tariffs, this List Price adjustment per Price Group Code will adjust accordingly. As governments may enact and retract these tariffs over time, this list price adjustment is non-negotiable to allow for ease of removal as needed.

Relative to system updates, these list price changes have been staged and data for distributor download will be rapidly made available in the APA/MMA App. For those who currently use IDW for data loading, it may take IDW some time to load the IDW system. As a result, it is suggested distributors use the APA/MMA App for data loading, as it will be the most current and most rapid source of data for system updates. For questions, please access the APA/MMA App or contact Dustin Baker of the GRM Global List Price Management Group at *dustin.baker@rockwellautomation.com.*

Rockwell Automation will continue to monitor tariff and trade actions by all governments, assuring our compliance with government policies as well as vigilance in minimizing impact to our customers.

For continued news and information on tariffs: US Trade Representative website: https://ustr.gov.

Best Regards,

David Bassett
Vice President, Global Revenue Management
Rockwell Automation
